

Ms Ada Yum, Registered Educational Psychologist, Caritas Hong Kong

As a committed staff member of Caritas-Hong Kong, Ada Yum has both been providing frontline educational psychological services and coordinating the agency's cross-service themed charity projects related to children's special educational needs (SENs). Her recent involvement in projects affiliated with the HKCSS includes two pioneer projects of early screening and intervention for preschool children suspected with developmental delay and ADHD. In these she and her team tried to bring positive changes to children and families using evidence-based strategies. Positive results were observed by outcome evaluation in collaboration with researchers in local universities.
