Theme of Event
Urban Sustainability: Inspiration & Solution

Rationale & Objectives
The inclusion of all communities is critical to sustainable development. The Conference will explore issues in the urban context including children, the elderly and families; gender and sustainability; and health, wellbeing and quality of life. Delegates will discuss the contribution of culture, creativity and social capital to sustainable communities; and the economics of environment, culture and society. The Conference will highlight NGO sustainability initiatives, community participation and the role of educators.

This annual event brings together professionals from a range of disciplines across the globe. Agency Members will benefit from cross-cultural networking opportunities, as well as cutting-edge insights to help inform how their organization can further strengthen its role and contribution to sustainable development.
